About the Statistics

Examined represents candidates who completed the CHCP certification examination during the applicable calendar year.

Passed represents candidates who achieved the established passing standard during the applicable calendar year.

Failed represents candidates who did not achieve the established passing standard during the applicable calendar year.

Pass Rate and **Fail Rate** are calculated using the number of candidates who passed or failed divided by the total number of candidates examined during the applicable calendar year. Percentages are rounded to the nearest whole percentage.

Statistics are reported by examination administration year and are updated annually.

Reporting Notes

The CHCP certification examination is administered during established testing windows throughout the year. Annual examination statistics represent completed examination administrations occurring within the applicable calendar year.

The number of individuals currently certified represents a point-in-time count of individuals holding active CHCP certification and is reported as of the date identified above.

Annual examination statistics and current certification information are maintained by the CHCP Certification Commission and updated annually to support transparency to candidates, certificants, and other interested stakeholders.
